

Project Development Phase Performance Test

Date	19 July 2026
Team ID	
Project Name	Visualization Tool for Electric Vehicle Charge and Range Analysis
Maximum Marks	

Model Performance Testing:

S.No.	Parameter	Screenshot / Values
1.	Data Rendered	
2.	Data Preprocessing	Data Processing: The EV datasets were imported into MySQL and connected to Tableau. The data was reviewed, field names and data types were verified, calculated fields were created where required, filters were applied for analysis, and the processed data was validated before generating the visualizations. This ensured the dataset was accurate, consistent, and ready for dashboard creation and analysis.
3.	Utilization of Filters	

4.	Calculation fields Used	
5.	Dashboard design	No of Visualizations / Graphs - 8 
		
6	Story Design	No of Visualizations / Graphs - 4
